

# Curriculum at Britannia

# The Britannia Curriculum Concepts

- What are they?
- Why are we doing them?
- How we implement them across our school

# The Britannia Curriculum Concepts

## What are they?

- A set of concepts that are followed in each subject from Years 1-6 with clear links to our EYFS curriculum.
- They enable us to track learning in these key concepts across the school.
  - They are represented by symbols.
- A different set of symbols for each subject.

# The Britannia Curriculum Concepts

Why are we doing them?

Our subject Leaders have an excellent knowledge of their subject progression, as they have designed our long term plans, the next step is to make this explicit to the children, through teaching using the concepts.

# The Britannia Curriculum Concepts

## Why are we doing them?

The national curriculum is knowledge based and we need to ensure that the our children can see the links in the knowledge they have learned from one year to the next in order to develop and progress. Using our concepts will help them with transferring this knowledge from their working memory to their long-term memory.

# The Britannia Curriculum Concepts

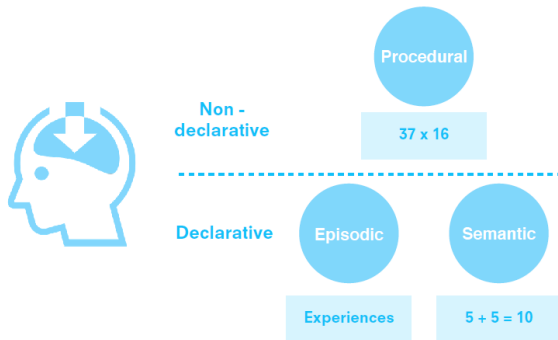

## Why are we doing them?

The theory behind this is linked to the work of Chris Quigley and his research based approach. A model to show how repetition and knowledge are essential to the retention of learning is on the following slide.

Learning is a change to long-term memory

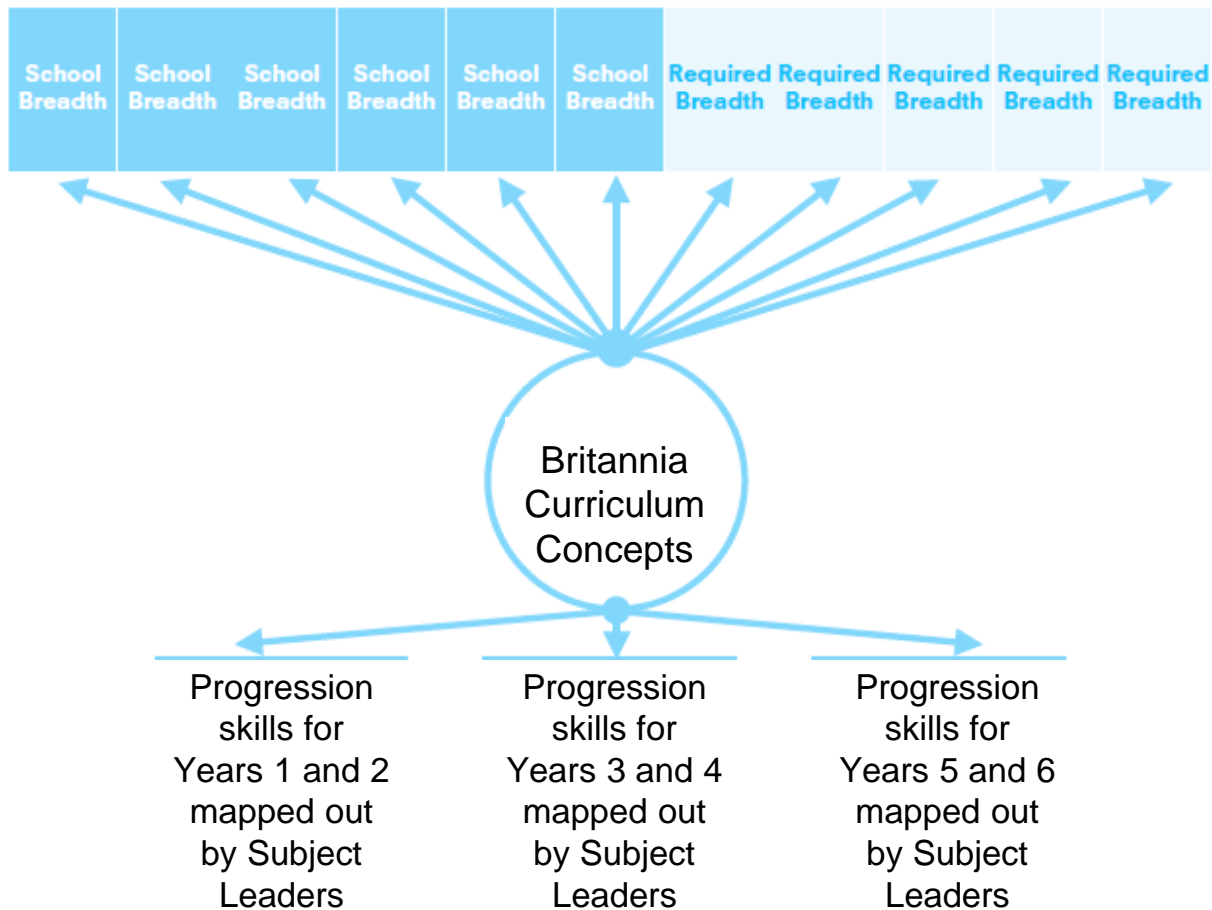

Repetition is required for long-term retention

Knowledge is vital as it is required for thinking and the more one has the easier it is to learn and remember

Britannia curriculum planned by our  
Subject Leaders

The National Curriculum content

# Using this model means:

- Our curriculum aims at the end of each year group are clear (the progression of knowledge and skills).
- The bigger picture for where the children are coming from and what we want them to achieve is clear.
- Children are then assessed against these skills termly to identify gaps in learning, which will inform further planning.

# Improving outcomes

In order for children's learning to progress, it is necessary for repetition to occur:

- From lesson to lesson - retrieval quiz, low stakes
- From block to block - recap and mini quiz (concepts)
  - From year to year - revisit (concepts)

Therefore, our Britannia Curriculum Concepts are a set of threads that run through each subject from Years 1-6, with strong links into our EYFS curriculum.

# Example:

Geography Unit of Learning  
e.g. Year 1 African Adventure

To achieve successful outcomes we need to achieve the skills  
e.g. Human and Physical Geography, fieldwork, locational knowledge, place  
knowledge.

We need to strengthen understanding in these key  
areas with knowledge (our Britannia Curriculum Concepts)  
e.g. human features, physical features, techniques (maps)

# Example:

Geography Unit of Learning  
e.g. Y6 Isle of Wight

To achieve successful outcomes we need to achieve the skills  
e.g. Human and Physical Geography, fieldwork, locational knowledge, place  
knowledge.

We need to strengthen understanding in these key  
areas with knowledge (our Britannia Curriculum Concepts)  
e.g. human features, physical features, techniques (maps)

# Referring back to concepts - History example

**Year 1 - Toys**

Artefacts

Focus on toys from the past, using toys as primary source evidence. Children explore the toys and discuss how toys have changed based on our knowledge of our own toys.

**Year 3 – Egyptians**

Artefacts

In Year 1, we examined toys to help us learn about what toys were like in the past because they were primary sources. Now we are going to explore some Egyptian primary sources to see what historians have discovered about the Egyptian civilisation.

**Year 5 – World War 2**

Artefacts

In Years 1 and 3 we learned about toys and the Egyptians by exploring primary sources. Now we are going to use some varied primary sources from WW2. What do you think these sources tell historians about the war?

# Referring back to concepts - DT example

## Year 2 – Catapult for a knight

Materials, tools  
& Components

Focus on basic measuring and cutting skills using tools safely to create a simple structure for our catapult.

## Year 4 – Lighthouses

Materials, tools  
& Components

In Year 2, we used tools to create a simple structure. Now we are going to use those accurate measuring and cutting skills to create a frame that will fasten to our junk model base and hold an electrical circuit for a lightbulb.

## Year 6 – Fairground rides

Materials, tools  
& Components

In Years 2 and 4, we learned about how to make simple structure and frame with tools and accurate measuring. Now we are going to use those skills to design and build a solid fairground ride structure that can encase an electrical circuit for a moving part (cam).

# The Britannia Curriculum Concepts

## Implementation

It is essential that the Britannia Curriculum Concepts are used throughout the school and therefore, they have become integral to our daily teaching of science and the foundation curriculum.

# What are the Britannia Curriculum Concepts for each subject?

We have developed Britannia Curriculum Concepts for Science, Geography, History, Art, DT, RE, PE, French, Music, Computing, RSHE and Forest School. Examples:

Geography

History

Art

DT

# The Bigger Picture

Concept Map - Geography

Concept	EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	Amazing Me Space	Frozen - Antarctica	South America London Australia	India Italy	Rivers - China Mountains - China	UK Geography - Past and Present North America	Isle of Wight Fairtrade - How chocolate changed the world - Mexico
	Animals and dinosaurs	Frozen	London	Italy	Rivers	UK Geography - Past and Present North America	Fairtrade - How chocolate changed the world

	Seaside and pirates	Journeys - Local area Dinosaurs	London	Italy	Rivers	UK Geography - Past and Present North America	Fairtrade - How chocolate changed the world
	Amazing Me Celebrations	Into the Woods Frozen	South America London	India Italy	Rivers Mountains	UK Geography - Past and Present North America	Isle of Wight Fairtrade - How chocolate changed the world
	Animals and dinosaurs	Frozen	London	Italy	Rivers	UK Geography - Past and Present North America	Fairtrade - How chocolate changed the world
	Growing and changing	African Adventure	Pirates and the Ocean Australia	India	Rivers	UK Geography - Past and Present North America	Fairtrade - How chocolate changed the world
	Seaside and pirates	Journeys Dinosaurs	London	Italy	Rivers	UK Geography - Past and Present North America	Fairtrade - How chocolate changed the world
	Amazing Me Animals and dinosaurs	Into the Woods Frozen	South America London	India Italy	Mountains	North America	Isle of Wight Fairtrade - How chocolate changed the world
	Seaside and pirates	African Adventure Journeys Dinosaurs	Pirates and the Ocean Australia	India	Mountains	North America	Fairtrade - How chocolate changed the world
	Physical Processes	AB Frozen African Adventure	South America Australia	India	Rivers Mountains	UK Geography - Past and Present North America	Fairtrade - How chocolate changed the world
	Human Processes			India	Rivers	UK Geography - Past and Present North America	Fairtrade - How chocolate changed the world
	Amazing Me Celebrations	Into the Woods Space	London Pirates and the Ocean	India Italy	Rivers Mountains	UK Geography - Past and Present North America	Isle of Wight
	Seaside and pirates	African Adventure Journeys	London Pirates and the Ocean	India Italy	Rivers Mountains	UK Geography - Past and Present North America	Isle of Wight
	Physical Processes	AB Frozen African Adventure	South America Australia	India	Rivers Mountains	UK Geography - Past and Present North America	Fairtrade - How chocolate changed the world
	Human Processes			India	Rivers	UK Geography - Past and Present North America	Fairtrade - How chocolate changed the world

In order to map out which concepts have been taught in each year group and through which themes, we have developed concept maps.

Concept	EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	Amazing Me	Space	South America	India	Rivers - China	UK Geography - Past and Present	Isle of Wight
	Animals and dinosaurs	Frozen - Antarctica	London	Italy	Mountains - China	UK Geography - Past and Present	Fairtrade - How chocolate changed the world - Mexico
	Growing and changing	African Adventure - Africa	Australia			North America	Fairtrade - How chocolate changed the world - Mexico
	Seaside and pirates	Journeys - Local area Dinosaurs					Fairtrade - How chocolate changed the world - Mexico

# The Concept Skills

The skills associated with these concepts come directly from the National Curriculum. The knowledge is from our Britannia curriculum, designed by our curriculum team of subject leaders.

Concept	KS1 Curriculum Skills	KS2 Curriculum Skills	LKS2 Curriculum Skills	UKS2 Curriculum Skills
<b>Physical Features</b> 	<b>ELG People, Culture and Communities</b> - Explain some similarities and differences between life in the country and life in other countries, drawing on knowledge from class, non-fiction texts and – where appropriate – maps.	<b>ELG The Natural World</b> - Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class.	<b>Geographical skills and field work</b> - To use aerial photographs and plans to compare and contrast features in the UK and a contrasting non-EU location.	<b>Geographical Skills and Field Work</b> - To use fieldwork to observe, measure, record and present the physical features of the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.
<b>Human Features</b> 	<b>ELG People, Culture and Communities</b> - Explain some similarities and differences between life in the country and life in other countries, drawing on knowledge from class, non-fiction texts and – where appropriate – maps.	<b>ELG The Natural World</b> - Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class.	<b>Geographical skills and field work</b> - To use aerial photographs and plans to compare and contrast features in the UK and a contrasting non-EU location.	<b>Geographical Skills and Field Work</b> - To use fieldwork to observe, measure, record and present the human features of the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.
<b>Physical Processes</b> 	<b>ELG The Natural World</b> - Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter.	<b>Human and Physical Geography</b> - To identify, describe and understand the workings of volcanoes, mountains, rivers and the water cycle.	<b>Human and Physical Geography</b> - To describe and understand key aspects of physical geography including climate zones, tides and vegetation belts.	<b>Human and Physical Geography</b> - To describe and understand types of settlement and land use, trade links and the distribution of natural resources including food, water, minerals and energy.
<b>Human Processes</b> 	<b>ELG The Natural World</b> - Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class.	<b>Human and Physical Geography</b> - To identify, describe and understand the workings of volcanoes, mountains, rivers and the water cycle.	<b>Human and Physical Geography</b> - To describe and understand key aspects of physical geography including climate zones, tides and vegetation belts.	<b>Human and Physical Geography</b> - To describe and understand types of settlement and land use, trade links and the distribution of natural resources including food, water, minerals and energy.

Concept	EYFS Curriculum Skills	KS1 Curriculum Skills	LKS2 Curriculum Skills	UKS2 Curriculum Skills
<b>Location</b> 	<b>ELG People, Culture and Communities</b> - Explain some similarities and differences between life in this country and life in other countries, drawing on knowledge from stories, non-fiction texts and – where appropriate – maps.	<b>Locational Knowledge</b> -To name and locate the world's seven continents and five oceans using globes, maps and atlases.                     -To use maps, atlases and globes to identify the UK and its countries and capital cities, as well as the countries, continents and oceans studied at this key stage.	<b>Locational Knowledge</b> -To locate the world's countries, using maps to focus on Europe, North and South America and identify key human and physical characteristics, countries and major cities.                     -To name key topographical features of the UK (including hills, mountains, coasts and rivers).                     -To identify the position and significance of latitude, longitude, Equator, Northern Hemisphere, Southern Hemisphere.	<b>Locational Knowledge</b> -To name and locate countries and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features (including hills, mountains, coasts and rivers), and understand how some of these aspects have changed over time.                     -To locate the world's countries, using maps to focus on Europe (including the location of Russia) and North and South America, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities.                     -To identify the position and significance of latitude, longitude, Equator, Northern Hemisphere, Southern Hemisphere, Tropics of Cancer and Capricorn, Arctic and Antarctic Circle, the Prime/Greenwich Meridian and time zones (including day and night).
	<b>ELG The Natural World</b> - Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class.	<b>Place Knowledge</b> -To compare similarities and differences of an area of the UK and a contrasting non-EU location.	<b>Place Knowledge</b> -To compare similarities and differences of an area of the UK and a contrasting non-EU location.	<b>Human and Physical Geography</b> -To identify hot and cold areas of the world in relation to the Equator and North and South Poles.

# How does this look on a Long Term Plan?

Isle of Wight													
Knowledge	Skills and related Concepts												
<ul style="list-style-type: none"> <li>Locate regions of UK on map/using atlas/digi map (eg. East Anglia, South East)</li> <li>Locate counties and cities of UK</li> <li>Zoom in on Isle of Wight /South Coast (linking to IOW trip)</li> <li>Look at topographical features of Isle of Wight (use Google Earth, atlases, digi map). Locate on OS Map using 6 figure grid references.</li> <li>Plot them on map, research them, have photos of them and write about them.                             <ul style="list-style-type: none"> <li>3 main rivers, coasts, hills (highest point of Isle of Wight)</li> </ul> </li> <li>Use photographs to create an accurate map of an area of the Isle of Wight.</li> <li>Find alternate routes to hotel/attractions in Isle of Wight.</li> <li>Learn about features of Isle of Wight including:                             <ul style="list-style-type: none"> <li>Rock types on Isle of Wight (chalk downs, clays, cretaceous - The Needles – different types of sand at Alum Bay)</li> <li>Population (Newport, Ryde, Cowes are most populated. Sandown and Shanklin form 'The Bay' area.)</li> <li>Landscape</li> <li>Tourism</li> <li>Length of coastline</li> <li>Activities in Isle of Wight (cycling, sailing, walking)</li> </ul> </li> <li>Compare tourism (The Needles).</li> <li>Compare human and physical features of Isle of Wight to Ipswich (use photos to support writing).</li> <li>Impact of erosion on Isle of Wight. Look at photos from 50 years ago compared to now (areas affected are Blackgang Chine). How would The Needles be impacted by erosion.</li> <li>Written piece at the end of the unit – similar to the Vocabulary Ninja inset with vocabulary at the top for children to use. At the end of the lesson, children can self assess and highlight the vocabulary that they have used, teachers could do this or both children and teachers could do this in different colours.</li> </ul>	<table border="1"> <thead> <tr> <th></th> <th>Locational Knowledge</th> </tr> </thead> <tbody> <tr> <td> <b>Location</b>  </td> <td>                     -To name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features (including hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time.                 </td> </tr> <tr> <td> <b>Physical Features</b>  </td> <td> <b>Geographical Skills and Fieldwork</b>                      -To use fieldwork to observe, measure, record and present the physical features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.   <b>Place Knowledge</b>                      -To understand similarities and differences in the human and physical differences with a region of the UK and the region in another country.                 </td> </tr> <tr> <td> <b>Human Features</b>  </td> <td> <b>Geographical Skills and Fieldwork</b>                      -To use fieldwork to observe, measure, record and present the human features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.   <b>Place Knowledge</b>                      -To understand similarities and differences in the human and physical differences with a region of the UK and the region in another country.                 </td> </tr> <tr> <td> <b>Physical Processes</b>  </td> <td> <b>Human and Physical Geography</b>                      -To describe and understand economic activity and the distribution of natural resources including food, water, minerals and energy.                      -To describe and understand key aspects of: physical geography, including: climate zones, biomes and vegetation belts, rivers, mountains, volcanoes and earthquakes, and the water cycle                 </td> </tr> <tr> <td> <b>Techniques</b>  </td> <td> <b>Geographical Skills and Fieldwork</b>                      -To use maps, atlases, globes and digital mapping (google earth) to locate countries and describe features studied                      -To use the eight points of a compass, four and six-figure grid references, symbols and key (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider world.                 </td> </tr> </tbody> </table>		Locational Knowledge	<b>Location</b> 	-To name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features (including hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time.	<b>Physical Features</b> 	<b>Geographical Skills and Fieldwork</b> -To use fieldwork to observe, measure, record and present the physical features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.  <b>Place Knowledge</b> -To understand similarities and differences in the human and physical differences with a region of the UK and the region in another country.	<b>Human Features</b> 	<b>Geographical Skills and Fieldwork</b> -To use fieldwork to observe, measure, record and present the human features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.  <b>Place Knowledge</b> -To understand similarities and differences in the human and physical differences with a region of the UK and the region in another country.	<b>Physical Processes</b> 	<b>Human and Physical Geography</b> -To describe and understand economic activity and the distribution of natural resources including food, water, minerals and energy. -To describe and understand key aspects of: physical geography, including: climate zones, biomes and vegetation belts, rivers, mountains, volcanoes and earthquakes, and the water cycle	<b>Techniques</b> 	<b>Geographical Skills and Fieldwork</b> -To use maps, atlases, globes and digital mapping (google earth) to locate countries and describe features studied -To use the eight points of a compass, four and six-figure grid references, symbols and key (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider world.
		Locational Knowledge											
	<b>Location</b> 	-To name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features (including hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time.											
	<b>Physical Features</b> 	<b>Geographical Skills and Fieldwork</b> -To use fieldwork to observe, measure, record and present the physical features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.  <b>Place Knowledge</b> -To understand similarities and differences in the human and physical differences with a region of the UK and the region in another country.											
	<b>Human Features</b> 	<b>Geographical Skills and Fieldwork</b> -To use fieldwork to observe, measure, record and present the human features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.  <b>Place Knowledge</b> -To understand similarities and differences in the human and physical differences with a region of the UK and the region in another country.											
	<b>Physical Processes</b> 	<b>Human and Physical Geography</b> -To describe and understand economic activity and the distribution of natural resources including food, water, minerals and energy. -To describe and understand key aspects of: physical geography, including: climate zones, biomes and vegetation belts, rivers, mountains, volcanoes and earthquakes, and the water cycle											
<b>Techniques</b> 	<b>Geographical Skills and Fieldwork</b> -To use maps, atlases, globes and digital mapping (google earth) to locate countries and describe features studied -To use the eight points of a compass, four and six-figure grid references, symbols and key (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider world.												

# How does this look on a Medium Term Plan?

## Medium Term Plan – Geography – Fairtrade – How Chocolate Changed the World

Year 6 – Summer

<b>Prior Learning:</b> 		<b>Opportunities for Reading and Writing:</b> -2x guided reading based on non-fiction texts – Curriculum Visions, Fair Trade. True –Stories: The Story Behind Chocolate. -Link with T4W to be planned in at a later date -Longer writing task		<b>Opportunities for visit/visitor:</b> Chocolate workshop (visitor) links with Tosier Chocolate, Ipswich, postponed due to CV. <a href="mailto:tosierchocolate@gmail.com">tosierchocolate@gmail.com</a>	
Session	Objective –from National curriculum	Knowledge, Essential skills, and Content (inc scaffold for SEN/PP)		Resources	Vocabulary
1 w/b	<b>Location</b> <p><b>Locational Knowledge</b></p> <ul style="list-style-type: none"> <li>-To name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features (including hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time.</li> <li>-To locate the world's countries, using maps to focus on Europe (including the location of Russia) and North and South America, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities</li> <li>-To identify the position and significance of latitude, longitude, Equator, Northern Hemisphere, Southern Hemisphere, Tropics of Cancer and Capricorn, Arctic and Antarctic Circle, the Prime/Greenwich Meridian and time zones (including day and night).</li> </ul>	<b>Introduction:</b> -Recap previously taught geographical skills, linking to prior learning in the concepts studied. -Introduce knowledge organisers. <b>Where in the world is Mexico?</b> <a href="https://digimapforschools.edina.ac.uk/roam/map/schools">https://digimapforschools.edina.ac.uk/roam/map/schools</a> -Use <b>Digimap</b> for the tasks below (username IP45HE, password zished2121). -Revise prior learning about the continents and countries of the world. Give children time to explore the globe, asking them to locate countries and quizzing them on the location of capital cities. -Revise the hemispheres, tropics, oceans etc. -Zoom in on Mexico. Where does it border? How big is it? Which bodies of water surround it? Knowledge: Basic knowledge of continents, countries, the equator, hemispheres and tropics. Locate Mexico on the world map. Outcomes: labelled world maps.		Knowledge organisers. World maps to label.	Northern Hemisphere, Southern Hemisphere, Tropic of Cancer, Tropic of Capricorn, continents, capital city, Mexico, equator, ocean, sea, climate, biome, trade route, Fairtrade
2 w/b	<b>Techniques</b> <p><b>Geographical Skills and Fieldwork</b></p> <ul style="list-style-type: none"> <li>-To use maps, atlases, globes and digital mapping (google earth) to locate countries and describe features studied</li> </ul>	<b>What is Mexico like?</b> -Recap skills from the previous lesson with a mini quiz. <a href="https://digimapforschools.edina.ac.uk/roam/map/schools">https://digimapforschools.edina.ac.uk/roam/map/schools</a> -Use <b>Digimap</b> for the tasks below (username IP45HE, password zished2121).		Computers, images of Mexico	
3 w/b	<b>Physical Features</b> <p><b>Geographical Skills and Fieldwork</b></p> <ul style="list-style-type: none"> <li>-To use fieldwork to observe, measure, record and present the physical features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.</li> </ul>	-Explore the country of Mexico, carrying out research from books and the internet. What is the population? Weather? Biomes? Human and physical features? Create a double page spread, including images. Focus on the whole country or one particular region. Knowledge: the key features of Mexico.			

# How does this look on a Knowledge Organiser?

**Year 6 Geography Knowledge Organiser**

## ISLE OF WIGHT

**Topographical Features**

Topography describes the physical features of an area of land. These features typically include natural formations such as mountains, rivers, lakes, and valleys. Topography often records the various elevations of an area using a topographical map.

**Physical Features of the Isle of Wight**

Examples: The Needles, The Medina River, Estuaries (e.g. Eastern Yar, Western Yar, Newtown), Chines (e.g. Shanklin Chine) beaches, coastlines

**Human Features**

Human features describes those which are man-made. Common examples of human features would be bridges, roads, buildings, monuments/statues, castles and attractions (e.g. the London Eye).

**Location**

**Key Vocabulary**

Physical Features	The natural features of a landscape or region of land.
Human Features	The man-made features of a landscape or region of land.
Physical Processes	Constant natural changes, e.g. coastal erosion, tectonic plate movement.
Ordinance Survey Maps	High quality, detailed maps of Great Britain, in varied scales. Road with grid references.
Contour Lines	Lines on a map joining points of equal height, above or below sea level.

**Location**

**Human Features of the Isle of Wight**

Examples: Badging Chine, Godshill Model Village, Osborne House, Carisbrooke Castle, St Catherine's Lighthouse, Yarmouth Pier, The IOW Old Battery

Location

Physical Features

Human Features

Physical Processes

Human Processes

Techniques

Our knowledge organisers include the Curriculum Concepts so children can see how they directly link to their learning in any particular unit of work.

# What Next?

- We have been using the Britannia Curriculum Concepts in school since September 2020. Although the initial implementation was impeded by periods of lockdown, we have now had one complete school year of teaching using the curriculum concepts.
  - The concepts are used by teachers to inform their long term and medium term planning.
  - Children see the concepts on a daily basis, included in their teacher's modelling, displayed around the classroom, copied onto teaching resources and on subject display boards in central locations around the school.
- The full impact of our science and foundation subject curriculum will be most noticeable as we revisit subjects, during block teaching within the academic year and in future years as children's retention of knowledge and skills becomes evident.

# Further Information

These slides provide the rationale behind the Britannia Curriculum Concept approach. Further information regarding curriculum coverage and teaching can be found under the 'Curriculum' tab on our school website. If you would like any further information regarding our curriculum, please contact our school office.
